

# Cloudflare for Government

Security and performance for government agencies

## Protect agency employees and improve citizen services

As government agencies develop public-facing digital services and modernize high-priority critical systems, it becomes increasingly important to work with trusted cloud service providers to deliver scalable, cost-effective solutions that are easy to deploy and simple to manage.

**Cloudflare for Government** is a suite of services for U.S. government and public sector agencies, delivered from our global, highly resilient cloud network with built-in security and performance.

## Security and performance for government agencies

### Standardized approach

The Federal Risk and Authorization Management Program (“FedRAMP”) is a US-government-wide program that provides a standardized approach to security assessment, authorization, and continuous monitoring for cloud products and services.

### Trust and security

Cloudflare for Government has achieved FedRAMP Moderate Authorization. This certification demonstrates Cloudflare’s continued commitment to customer trust and our ability to secure and protect U.S. government and public sector organizations.

### Personalized advice

Our dedicated team of public sector specialists will meet with your team to discuss your specific organizational use cases and challenges.

Start your journey to a faster, more reliable, more secure network

## Achieve security and compliance goals with Cloudflare

Cloudflare is a global network designed to make everything connected to the Internet secure, private, fast, and reliable. With Cloudflare for Government, US government agencies can secure their websites, APIs, and Internet applications, protect their agency networks, employees, and devices, and write and deploy code that runs on the network edge.

By partnering with Cloudflare, government agencies can improve citizen services, deploy services more easily, achieve compliance goals, and accelerate the pace of innovation.
