

# Cloudflare for Government

Delivering the modern security, network and application capabilities that power your mission today – and tomorrow.

## Partner with us to accomplish your goals

Federal agencies are under pressure to modernize cybersecurity and improve digital services, with an intense focus on operational efficiency and productivity. At Cloudflare, we're focused on the outcomes that matter most.

### Protect

Mitigate risk with advanced cyber security capabilities

-  Mature Zero Trust and TIC 3.0 architectures
-  Integrate seamlessly with existing technologies
-  Enhance global threat detection and response

### Connect

Enhance digital service performance and resilience

-  Modernize apps and networks
-  Improve service quality and responsiveness
-  Boost workforce and partner productivity

### Accelerate

Modernize faster and boost operational efficiency

-  Reimagine digital government with AI
-  Reduce costs and complexity
-  Break the cycle of technology debt

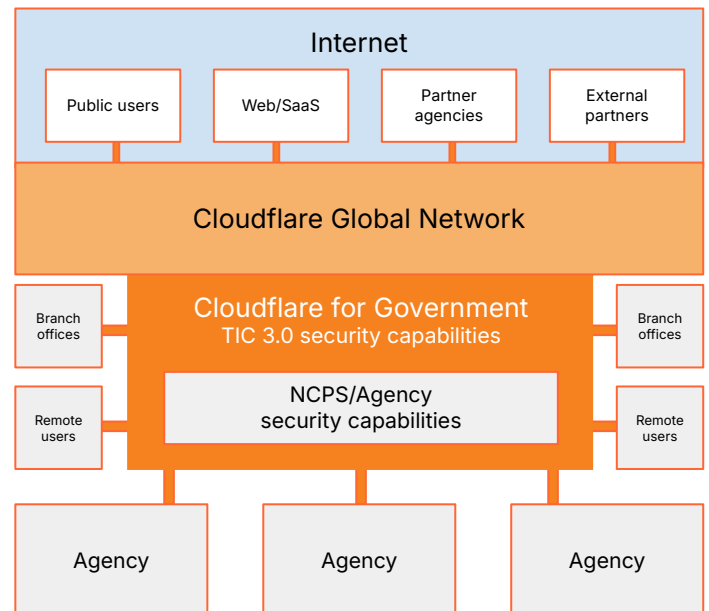

## Cloudflare is TIC 3.0 embedded in our global network

“ The goal of TIC 3.0 is to **secure federal data, networks, and boundaries** while providing visibility into agency traffic including cloud communications. ”

– TIC 3.0 Core Guidance Volume 1: Program Guidebook

Agencies partner with Cloudflare for CISA's Trusted Internet Connections 3.0 program for:

- **Higher performance.** Cloudflare provides TIC services from all 32 of our FedRAMP data centers, resulting in better performance for every use case.
- **Maximum capability.** Cloudflare provides extensive coverage across TIC 3.0 security capabilities.
- **Greater efficiency.** Cloudflare services are a fraction of the costs of legacy MTIPS providers.

# The Cloudflare advantage over any other approach

## Cloudflare Global Network

As one of the most interconnected networks, Cloudflare delivers local capabilities with global scale

**32**

FedRAMP data centers across 11 metro areas

**335**

cities in 120+ countries

**13,000+**

networks directly connect to Cloudflare, including every major ISP, cloud provider, and enterprise

**348 Tbps**

global network edge capacity, consisting of transit connections, peering and private network interconnects

**~50 ms**

from 95% of the world's Internet-connected population

**150+**

AI inference locations powered by GPUs

## Cloudflare for Government is FedRAMP Moderate authorized

Our unique approach to FedRAMP authorization gives you maximum capability— everywhere

### Every service at every location

No special FedRAMP enclaves that limits or delays the innovative capabilities you need

### Single platform capabilities

Application and network services delivered consistently from our unified platform

### Direct network connections

Connect your data centers directly to Cloudflare's network for maximum performance and security

### Coming soon: FedRAMP High

Cloudflare deepened its commitment to the public sector by announcing our FedRAMP High authorization goal.

## Universal Advantages

As the world's first connectivity cloud, Cloudflare delivers differentiated capabilities that have earned the trust of millions of customers around the globe.

### Significant Cost Savings

- Vendor consolidation
- CapEx offload
- Administration

### Threat Intelligence

- Extensive visibility
- Threat models
- Intercepted attacks

### Data Localization

- Data restriction
- Compliance
- End user privacy

### Simplicity and Ease of Use

- Dashboard
- Integrations
- Automation
