Migration & Expert Professional Services
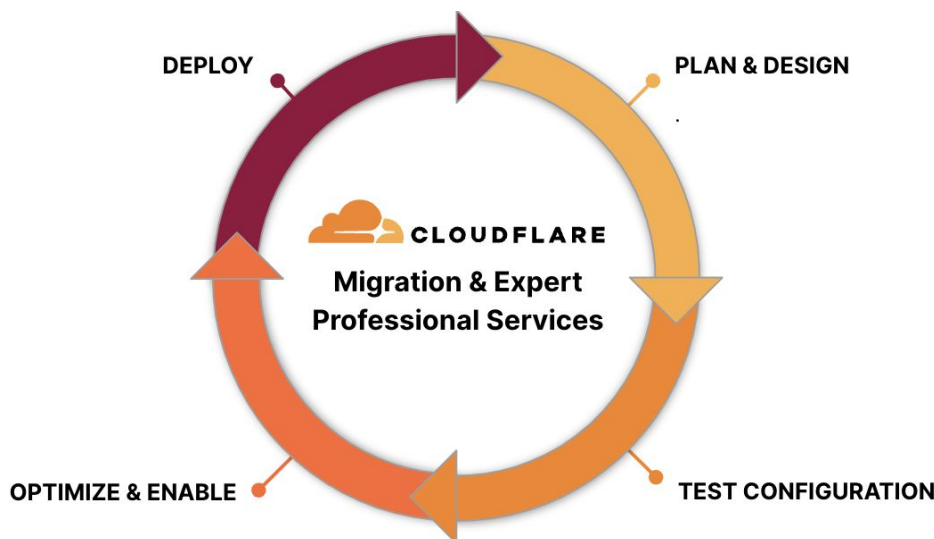

Cloudflare solutions implementation

Implement Quickly, Deploy Confidently

Add Cloudflare Implementation Experts to Your Team

Keeping pace with technology and cloud innovation is a continuous challenge for enterprises. This is why Cloudflare offers Migration and Expert Implementation Services, enabling organizations to tap into our existing tools and experience, to accelerate successful deployment of any mix of Cloudflare Platform solutions.

Cloudflare delivery managers, architects, engineers, and partners follow proven methods, bringing everyone together to establish requirements, determine success criteria, implement Cloudflare best practices, establish foundation for scale, and drive towards successful execution.

Minimize Disruption

Minimize misconfiguration risks, reduce level-of-effort for overstretched teams.

Maximize Benefit

Maximize efficiency by leveraging Cloudflare experts who help build a strong foundation from which to scale.

Accelerate Innovation

Reduce time-to-deploy, pave path to quicker innovation.

Implementation Assistance for All Cloudflare Platform Services, Across the Globe			
Plan & Design	**Test Configuration**	**Optimize & Enable**	**Deploy**
Cloudflare planning, design, and engineering experts work with your team to define requirements, map existing environment, and outline success criteria.	Cloudflare team creates test environment to meet specifications and manages pilot to confirm functioning as expected.	Enhancements are implemented to optimize performance. Admin enablement provided, along with additional resources, as needed.	Cloudflare team supports push to production, executes systems checklist to ensure functioning properly, and participates in warm hand-offs.

Service Options

Cloudflare offers hands-on Migration and Expert implementation services across our portfolio, with customization available for unique use cases.

↻ **Migration**	🔧 **Expert**
Hands-on migration assistance to accelerate your fresh start when moving from legacy providers such as Akamai, Fastly, or Zscaler. Migration services are architected to reduce operational complexity and to aid in seamless migration to Cloudflare.	A team of experts plan, design, test, and deploy unique use cases, such as highly regulated organizations, or expanded solution implementations, such as Cloudflare One. Expert services are tailored for more advanced deployments, which require additional implementation considerations.

Implementation services are limited-time engagements and require scoping to determine price and which option best meets your organization's needs.

Questions?

Contact your Cloudflare account team to learn more, review your needs, and kick off the scoping process with our Cloudflare implementation experts.
