

Cloudflare & Sumo Logic

Visualize Cloudflare Logs using Sumo Logic

The Value of Cloudflare Logs

Comprehensive Metadata on your Domain's Requests

Consolidate all your logs with your preferred cloud storage provider and analyze them using third-party or custom-built solutions. Specify time ranges, sample rates, and timestamp formats. Select from over 55+ fields with rich data about the client, origin, firewall, cache, and Cloudflare routing.

How it works

Analytics

Get granular insight into where your traffic is coming from, including which countries, the types of devices, browsers, etc.

Debugging

Retroactively investigate errors and events such as increases in rate-limited requests or firewall blocks

Monitoring

Monitor traffic in near real-time so you can take action in case of attacks or make performance adjustments

Configuration Tuning

Improve application performance and security by tuning Cloudflare features based on granular insights

Visualize Cloudflare Logs using Sumo Logic

Sumo Logic Makes it Easy to Visualize your Cloudflare Logs

We have partnered with Sumo Logic, a cloud-native log analytics platform, to make visualizing Cloudflare logs easy and help you understand events and trends from your websites and applications on the Cloudflare network.

The Cloudflare App is available in Sumo Logic's App Catalog and includes pre-built dashboards and filters you can use for analytics, debugging, and monitoring.

Find more information on Sumo Logic's website at: <https://bit.ly/2Nxas0s>

sumo logic

Cloudflare Dashboard

Use pre-built dashboards for advanced analytics or customize your own

Combine Data Sources

Combine Cloudflare logs with other data sources, such as your origin server logs, for better end-to-end visibility

Monitoring and Alerting

Use Sumo Logic's monitoring and alerting features to alert you on events you define

Step 1

Call your Customer Success Manager to enable Cloudflare Logs for your domain

Step 2

Push or pull your logs to your preferred cloud storage provider

Step 3

Set up a Hosted Collector in Sumo Logic and install the Cloudflare App

About Cloudflare

Cloudflare, Inc. (www.cloudflare.com / @cloudflare) is on a mission to help build a better Internet. Cloudflare's platform protects and accelerates any Internet application online without adding hardware, installing software, or changing a line of code.

Internet properties powered by Cloudflare have all web traffic routed through its intelligent global network, which gets smarter with every request. As a result, they see significant improvement in performance and a decrease in spam and other attacks. Cloudflare was named to Entrepreneur Magazine's Top Company Cultures 2018 list and ranked among the World's Most Innovative Companies by Fast Company in 2019. Headquartered in San Francisco, CA, Cloudflare has offices in Austin, TX, Champaign, IL, New York, NY, San Jose, CA, Washington, D.C., Lisbon, London, Munich, Beijing, Singapore, and Sydney.
