

Zero Trust & SASE Workshop

Collaborate with Cloudflare experts and build your roadmap to modernize security and transform your network.

Strategize with Cloudflare

In a live 90-minute session, Cloudflare experts will help you develop your short- and long-term roadmap towards Zero Trust security and a SASE architecture.

The workshop will help you:

- **Identify challenges of existing architecture:** Evaluate your current architecture to identify pain points, vulnerabilities, and inefficiencies.
- **Begin building a business case:** Articulate the strategic value of modernizing security.
- **Map a migration plan:** Outline step-by-step guidance to transition from your current state to your aspirational state.
- **Find your starting point:** Prioritize key use cases and 'quick wins,' so you can begin realizing value as swiftly as possible

Adopt SASE with Cloudflare One
