Secure and evolve your hybrid cloud and networks

Board-level scrutiny. Shifting compliance requirements. Expanding attack surfaces. Scarce cyber expertise and resources. Modernizing your approach to security and networking under these pressures across a tangled, hybrid multi-cloud landscape is more than many organizations are able or willing to do.

Accenture and Cloudflare help enterprises rethink their approach to modern security, network, and compliance requirements—no matter the complexity or technology in place. Together, we help businesses achieve dramatic simplification and cost reductions at scale in order to free up resources to invest in innovation, all while improving your overall security posture and delivering exceptional digital experiences.

Secure digital services delivery from end to end

Safely support a hybrid workforce and remote locations

Improve end user experience and application performance

Rationalize SecOps tools to reduce cost, overhead, and signal noise

Enable rapid response with centralized visibility, control, and insights

Enable more rigor, reporting, and effectiveness around compliance

Cloudflare and Accenture are better together

Accenture

- Comprehensive end-to-end and industry-tailored solution services.
- Understanding of client's unique technology estate to provide strategy to enhance security.
- Speed and acceleration leveraging internal assets and technology / industry expertise.
- As-as-a-service capabilities for ongoing operational improvement.
- Strategic partnerships to develop and stay at the forefront of technology innovation.

Client Outcomes

Reduced Cyber Risk

Digital Transformation

Control Operational Costs

Innovation and AI

Cloudflare

- An innovative solution for true transformation of networking, security, and applications.
- Achieve global compliance, mitigate risks, and reduce attack surface up to 95% for apps, users and threat vectors.
- 95% of Internet users are 50ms away from the Cloudflare network which further reduces costs.
- Reduce cost and simplify operations with a single platform and interface that reduced TCO by up to 50%.
- Improve app performance and reduce costs when you deploy serverless AI and full stack apps globally.

Solutions available from Accenture and Cloudflare

Zero trust network & SASE

Enterprises are looking to simplify access while reducing risk as digital services and hybrid, fluid workforces grow. Accenture utilizes Cloudflare's network and SASE capabilities to seamlessly incorporate infrastructure into a globally interconnected, rapidly expanding network and a streamlined digital workforce experience.

Network modernization

Rapid cloud adoption, an expanding attack surface, and constrained resources are driving the need for networks to modernize. Accenture services with Cloudflare solutions support clients in new and transformative network security capabilities. This results in a modern software-defined. cloud-native network that enables the organization today and beyond.

Cloud transformation

Cloud journeys have become incredibly complex and are compounding technical debt and tool bloat. Customers can accelerate their cloud journey with Accenture's cloud strategy and migration services, while benefiting from Cloudflare's performance optimization and security capabilities.

About Accenture and Cloudflare

Accenture

Serving 9,000 clients globally across:

- 40+ industries
- 200+ offices and operations in 49 countries
- 50+ delivery centers

Investing in innovation with:

- 100+ innovation locations
- $1.3B invested in R&D across assets, platforms, industry and functional solutions

Global corporate recognition

- #160 on Forbes Global 2000
- #220 on FORTUNE Global 500
- #32 on FORTUNE World's Most Admired Companies
- #22 on Brand Most Valuable Global Brands
- #31 on Interbrand Best Global Brands

Cloudflare

Serving customers

- The world's first connectivity cloud, Cloudflare connects and protects millions of customers globally
- 30% of the Fortune 1000 rely on Cloudflare
- Data centers in over 310 cities

Cloudflare global reach

- Security at scale with 170B threats blocked daily
- 95% of world's Internet users are within 50ms of our network
- Serving approximately 20% of all Internet traffic

Industry and analyst recognition

- Representative Vendor in Gartner Market Guide for Integrated Cloud Email Security
- 2022 Gartner® Peer Insights™ Customers' Choice for CDN and WAAP
- Leader in 2023 Forrester Wave™: Enterprise Email Security
- Leader in 2023 IDC MarketScape: Zero Trust Network Access
