Cloudflare for Education

Take learning to the next level with security, reliability and performance on Cloudflare
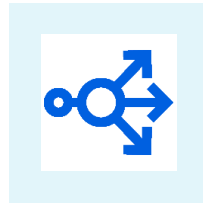

What can Cloudflare do for Education

Cloudflare helps schools and universities provide secure access to online resources, while shielding them from attacks and downtime.
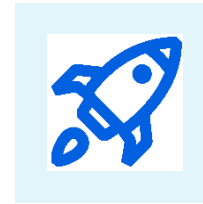

Security

Multi-layer approach to security, protecting students and teachers' personal information, e-learning applications and networks.
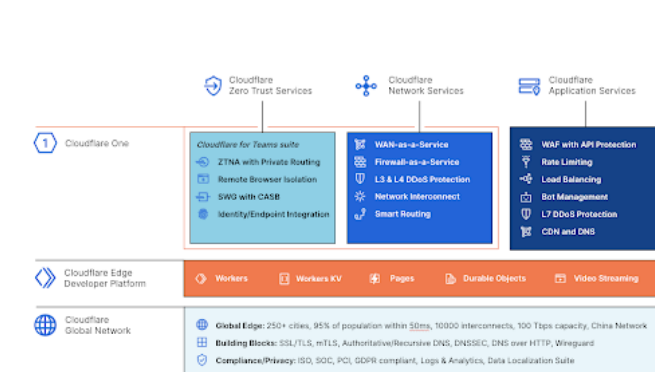

Reliability

Keep e-learning applications fast, available, and scalable, even during unexpected traffic spikes or infrastructure outages.

Performance

Our content delivery network and intelligent routing reduce latency by delivering content closer to the students.

The Cloudflare advantage

Cloudflare is a global network designed to make everything you connect to the Internet secure, private, fast, and reliable. It protects and accelerates external, public-facing web sites, learning management systems and student information systems.

Cloudflare's architecture gives you an integrated set of L3-L7 network services, manageable from a single pane of glass.

Cloudflare's network is built with data protection in mind. We comply with local regulations for data locality and storage. Our certifications include: ISO 27001:2013, ISO 27701:2019, SOC 2 Type II.

Why do educational institutions choose Cloudflare

Network DDoS Protection
Cloudflare Magic Transit protects entire IP subnets from DDoS attacks, while also accelerating network traffic.

Secure remote access
Cloudflare Access enable students, teachers and staff to securely access online resources — without performance degradation or worrying about malware, data breaches, and other known threats. With remote browser isolation Cloudflare protects users against unknown threats.

Bot management
Protect students and teachers from account takeovers with advanced malicious bot detection and mitigation.

Ease of use
Configuring Cloudflare solutions is quick and easy, with no code changes required. Every product can be managed from a single dashboard, giving admins full visibility and control.

Do more with less
Reduce complexity and consolidate technology by using integrated security and networking services, managed from a single pane of glass, with a predictable pricing model.

"Magic Transit has made a huge difference to Godwin Heights PSD. Last year, I had to sit at my desk and monitor for DDoS attacks. Now I can focus on other duties because Magic Transit blocks these attacks."

Johann Radloff
Director of IT
Goodwin Heights PSD

"Cloudflare's solutions are easy to deploy, they're user-friendly, and they immediately show value. Getting developers to buy into a security product can be tricky. Access and Cloudflare WAF have made their jobs easier."

Alexandre Papadopoulos
Director of Cyber Security
INSEAD
